Over 6 years of experience, working as a Full stack Developer for a world leading IT consulting organization. Experienced in designing, developing, leading, and managing web applications that drive business growth. Passionate about learning new technologies and making new ideas into reality.

EXPERIENCE

July 2017 – PRESENT
IT ANALYST, TATA CONSULTANCY SERVICES (TCS)
Working for *Nielsen Connect (NIQ)*

- Experienced in designing, developing, and building modern web applications using ANGULAR, REACT
- Developed REST API services with SPRIN BOOT and NODE JS.
- Experienced in DevOps, Jenkins, Azure, GCP, Docker, etc.
- Managing multiple development teams for numerous projects.
- Excellent CLIENT communication skills
- Familiar with SELENIUM, PROTRACTOR, CYPRESS and JASMINE for E2E Automation and Unit testing
- Experienced in SONARQUBE configuration for code analysis and optimization
- Managing and monitoring current applications and internal systems
- Proficient user of code version control tools such as BITBUCKET, GITLAB, GITHUB
- Active participant on AGILE way of working including story creation and sprint planning
- Experience in taking various tech session on Angular, Protractor and JavaScript

SKILLS

- Web Development
- Angular
- Spring Boot
- Typescript, Java Script
- HTML, CSS, SCSS
- Node
- Jenkins
- Azure, Google Cloud
- Java, Python, C, C++
- Protractor, Selenium, Jasmine, Cypress
- ES6
- Material UI, Bootstrap, AgGrid, PrimeNg
- RxJs
- Agile, Jira
- GIT
- Unix/Linux
- SQL, Mongo
- Docker (Beginner)

OTHER TOOLS

Putty, WinSCP, Tomcat, VScode editor, IntelliJ, Eclipse, GitBash, Bit bucket, Dbeaver, Source Tree

PROJECTS

- DISCOVER CONFIG MANAGER (Angular, Sprint Boot, Azure, Jenkins)

ANGULAR 14 and Sprint boot-based development project from scratch. Application used to construct customized chars for the users for generating various types of reports and charts. Applications are built and deployed through Jenkins V2 and AZURE cloud services.
   -- **Period:** 01/04/2022 – current project
   -- **Role:** Tech lead, Sprint planning and estimations, Handling DevOps activities, Verifying PR's

- ANALYTICAL FRAMEWORK (Angular, Spring Boot, Docker)

Created a new application based on the existing analytical framework for adding product features. The application is created in ANGULAR 10 as the front end and SPRING BOOT as the backend service. Used JWT-based authentication and supported multi-role logins. New modules are deployed as DOCKER containers.
   -- **Period:** 01/03/2021 – 31/03/2022
   -- **Role:** Team Lead, Verifying PR's, Sprint planning and estimations

- PRODUCT DASHBOARD (Angular, Spring Boot, Mongo)

A client web application that used to onboard different products for multiple teams across the DM. The application is built with Angular 8 on the front end and Spring Boot and MongoDB on the back end.
   -- **Period:** 01/01/2020 - 28/02/2021
   -- **Role:** UI team lead, Verifying PR's, Handling Sprint demos

- PRICE EVALUATOR (Angular, Spring Boot)

Migrated an existing client application that used to evaluate the products price, the legacy application was developed in EXTJS and JAVA. It provides a view of prize data using charts and graphs. The new application is created in ANGULAR 8 as front end and SPRING BOOT, SQL as the backend service. This app is deployed by using JENKINS and CI/CD pipeline.
   -- **Period:** 01/01/2019 – 31/12/2019
   -- **Role:** UI team lead, Story refinement

- EMPLOYEE DASHBOARD (Angular, Node Express JS development)

Created a dashboard for storing employees' project, work experience, and course completion details. implemented an automated alerting system to notify users about the due date and mandatory course details.
   -- **Period:** 01/09/2018 – 31/12/2018
   -- **Role:** 100% Design, Development, and deployment process

- REPORT GENERATOR (Java Tech upgrade and migration project)

A client web application to generate consumer product reports based on the input factors. The legacy system is being rewritten in Struts framework and using SQL Data base. Enhanced application with new features and upgraded the project with JAVA 8 and TOMCAT 9 configuration.
   -- **Period:** 01/10/2017 – 31/08/2018
   -- **Role:** Developer

AWARDS AND ADDITIONAL INFORMATION

- TCS Contextual Master
- TCS Golden Guru
- TCS Digital Cadre Associate
- TCS Global slam dunk hackathon (2021) Runner up, Design-thon Challenge (2020) Runner Up
- Star of the month award, young innovator award, 100% Customer Satisfaction award
- Creating and posting different web, mobile applications, and web templates in the GitHub community (puzzle games, online grocery, shopping, personal websites, admin portal, etc.)

EDUCATION

MARCH 2021
MCA, SASTRA UNIVERSITY
Completed Master of Computer Applications

MAR 2017
BCA, MARIAN COLLEGE KUTTIKKANAM
Completed Bachelor's Degree in Computer Application
